

Engineering Services

AND Automation has a 10200sq ft facility in the Midlands close to Junction 25 of the M1.

AND Automation offers the complete integrated solution for Industrial Automation. We integrate plant devices across intelligent networks to provide real time control using market leading PLC systems. Good operation decisions are made using the visualisation tools we provide through our HMI & SCADA solutions. Optimum business decisions are enabled using our Real Time reporting applications.

Our mission is to provide complete automation solutions using proven technology to give high performance systems that have a reduced total cost of ownership. Key to this is our drive to achieve complete customer satisfaction.

Our core engineering services cover:

- Design & Process Consultancy
- Project Management
- Hardware Design for Control Panels, MCC's
- Software Design for PLC & HMI software
- IT Infrastructure Design & Applications
- Safety System Design (Risk Assessments, Categorisation & Implementation)
- Real Time Reporting Solutions: OEE, Pareto Fault Analysis
- Computer Aided Design
- Technical Authoring
- Project & Simulation Testing
- Onsite Commissioning
- Service Support

AND Automation are experienced in many industries including:

- Chemicals
- Food & Beverage
- Aggregates
- Utilities
- Materials Handling
